

The **Unication Alpha Elite Pager Holster** is included with every Alpha Elite pager, but is available individually if the original needs to be replaced. Made of tough polycarbonate plastic, the holster is a semi-transparent smoke-black color that goes well with the black housing of the Alpha Elite pager. The transparent nature of the holster allows the user to read a message without having to remove the pager from the holster.

If reading a message out of the holster is preferred, its design also allows for easy pager removal. The holster has an integrated belt clip and adds superior protection to the pager and its LCD display. All Unication Alphanumeric pagers use the same holster, so it can be used interchangeably with Alpha Elegant and Alpha Legend Plus pager models.
