

LED Signs with Paging Controllers

A range of LED moving message displays with integrated intelligent paging receivers able to be deployed anywhere on a local area or wide area paging network for a wide variety of messaging and information purposes including campus emergency mass alerting, information display and for specialized applications such as nursecall.

The following are our standard displays for indoor and outdoor use however custom sizes and specifications are also available on request.

DA510 Multicolour LED Display

This LED display was specially developed for nursecall systems however may equally be used in any environment needing the ability to send short information messages via a paging system to display on a multi colour LED display.
